

**Macler\***

**STANDARD**

Line

Dialkyl  
**Chloride**  
**75%**

**Cationic surfactant**

Quaternary ammonium

Hygiene  
and cleaning  
Cationic active  
for softeners

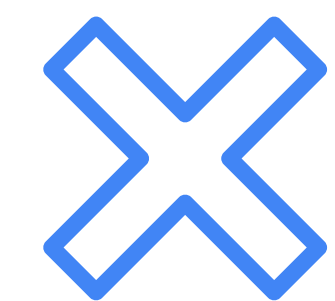

Textile  
Cationic active  
for softeners

Agricultural  
Dispersant

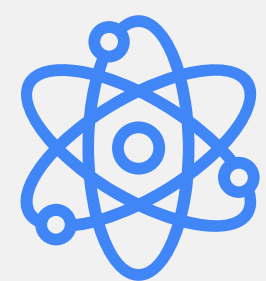

## **Contraindications and situations to avoid**

Incompatible with anionic  
products and sodium

## Physical-chemical specifications

Parameters	Dialkyl Chloride 75%
Physical State, 25°C	Solid
Appearance	Turbid to translucent
Water (%)	5,0 - 12,0
Free Amine (%)	0,0 - 2,0
Ashes (%)	0,0 - 0,2
Cor Lovibond, Yellow	0,0 - 2,5
Lovibond Color, Red	0,0 - 1,0
pH 10%, ethanol/water	6,0 - 9,0
Active (%)	74,0 - 76,0

## Homologation

Contact our sales team and request a sample for testing and homologation!

# TrustScan®

All of our Standard products go through **TrustScan!**

A **methodology** that ensures the quality of the product at the time of application. We believe that a product with the **correct concentration** is the minimum we must provide.

**TrustScan** is more than an anti-fraud seal!

Due to the fact that it is one of the most traditional surfactants and has a low price, it is often adopted in cases where its performance does **not present** a cost-benefit ratio. After all, a low price does not always indicate a low cost in the application inside the formula.

To find out if you are using this product in the most cost-effective way and discover other solutions focused on **cost-benefit**, count on our Smart**Lab**!

**SmartLab** is a research and development department entirely dedicated to our active customers.

Live the **experience** of having a **strategic** partner at your service. Count on Smart**Lab**!

Contact our sales team. We will offer all our **know-how** to your product. If you have any questions, please contact our Smart**Lab**.

**Macler\***

Our chemistry  
in **harmony**  
with your routine.
