

Macler*

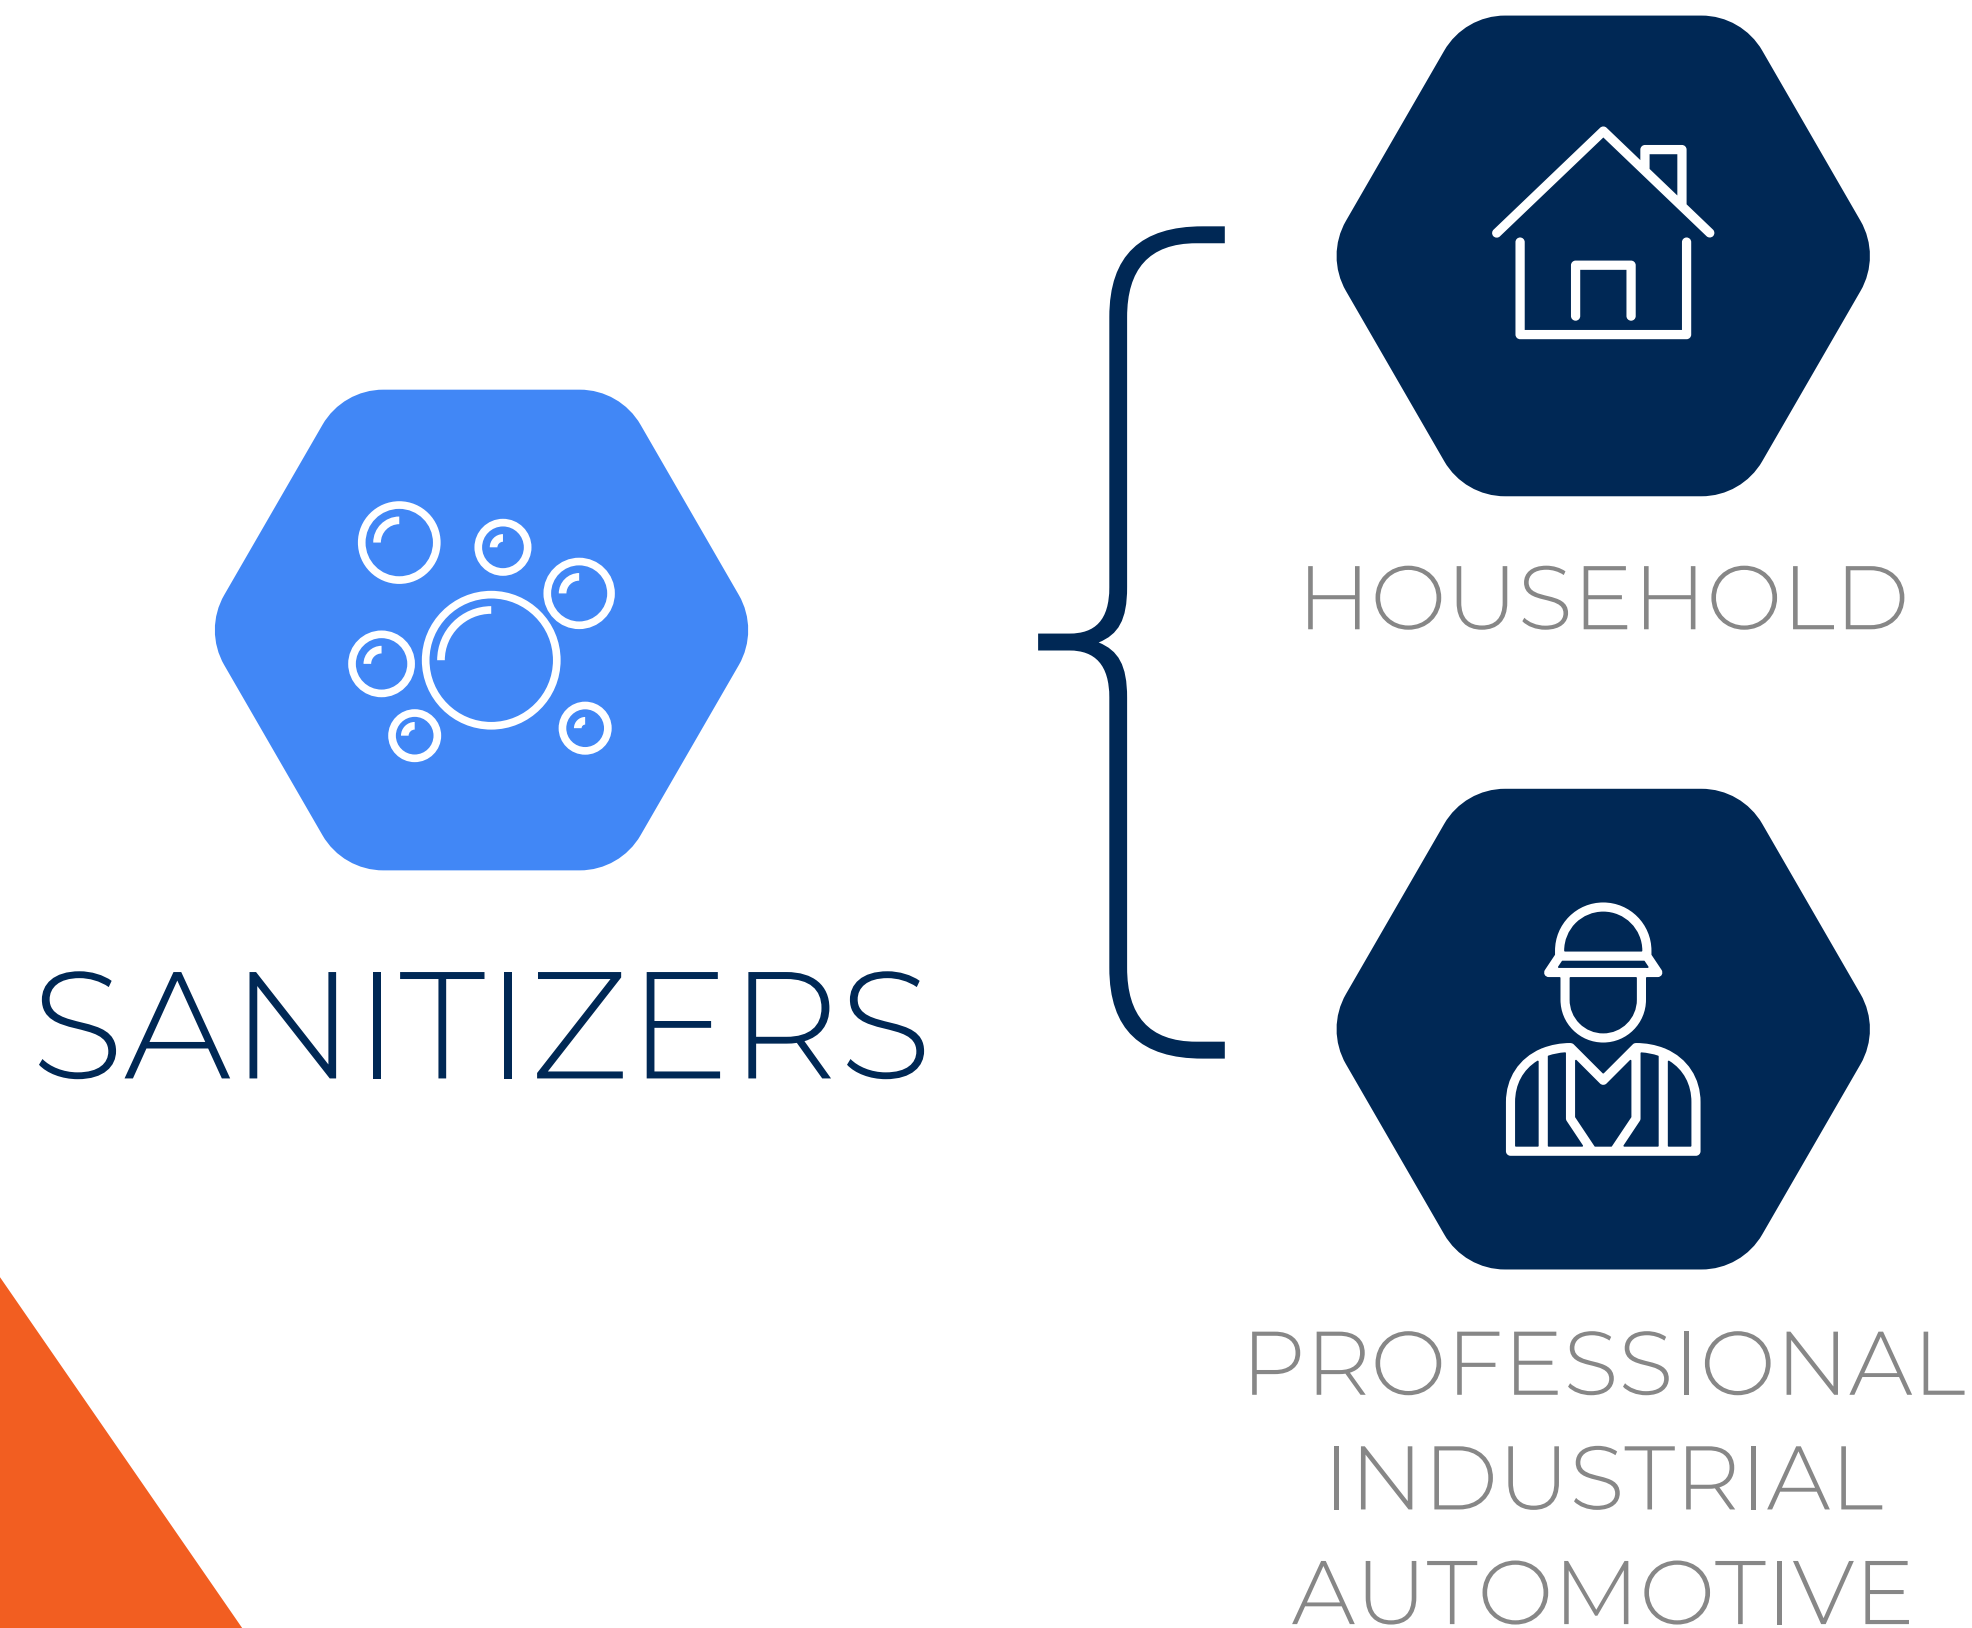

Prime 125B

Non-ionic surfactant for
high performance
formulations.

PRIME
Line

Application

- Laundry detergent
- Non-chlorine bleach
- Degreasers
- Cleaners

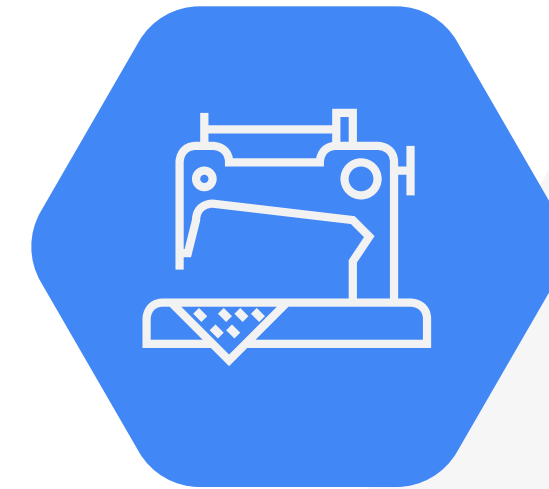

- Degreasers
- Caustic cleaners
- Acid cleaners
- Emulsions

Application

AGRICULTURAL

- Emulsions
- Dispersions
- Suspensions

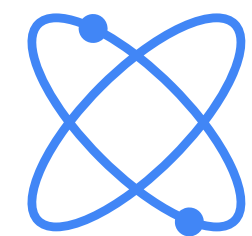

TEXTILE

- Humectants
- Degreasers
- Emulsifier

Benefits

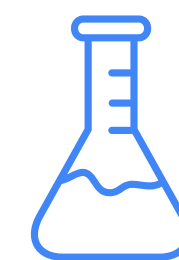

High detergency:
Replaces advantageously Nonyl Phenol 9,5EO and Lauryl Alcohol 7EO.

Compatible with any ionic system: cationic, anionic and non-ionic.

Non-controlled product:
Safe for the operator and for transportation.

High stability, even at extreme pHs (acidic and alkaline) and in the presence of Peroxide.

Foam control.

Excellent booster
for different surfactant systems.

Green and sustainable appeal:
free from phenols and from a renewable source.

PRIME

Line

Prime is a line of special molecules that solve a wide spectrum of difficulties for formulators.

The products in this line demand knowledge and previous experience in order to make the development work more efficient and with lower costs.

Most of the time, when specialties are applied without the proper know-how, they become costly, which for us, is nonsense.

Yes, technology should come in the interest of efficiency, but also of competitiveness and, above all, the generation of increased value.

For this process to be as productive as possible, our SmartLab goes on with technical support directing the formulator and, often, suggesting the development of a new solution internally.

Macler * SmartLab

Contact our SmartLab and see how Macler is able to deliver much more than just a sample.

We will take all our laboratory and know-how packed in the shape of a prototype of the product you intend to develop.

Live the experience of having a strategic partner at your service. Count on SmartLab!

Macler*

Our chemistry
in **harmony**
with your routine.
